RE: MODEL IAQ LEGISLATION

As you requested, we are faxing drafts of two documents prepared for Philip Morris containing language that could be used in IAQ legislation. The first document relates to tobacco control legislation that was being considered last year in Poland, and the second was prepared to see what a model (U.S.) state act might look like.

We do not have endorsement for model act legislation at this point, so neither of these documents, by any means, should be construed as an "officially sanctioned" SHB proposal.

We also are faxing a draft of indoor air legislation under consideration in Washington state.

We would be happy to follow up in any way that you feel is appropriate.
